Knacktoon Uploader: OAuth flow and upload evidence

Google Cloud project knacktoon-uploader (285886549271). Internal tool; the only user is the owner of the three Knacktoon channels. Screenshots taken 4 Nov 2026.

1. Sign-in: account chooser (links to our Privacy Policy and Terms)

2. Unverified-app notice (shown until verification)

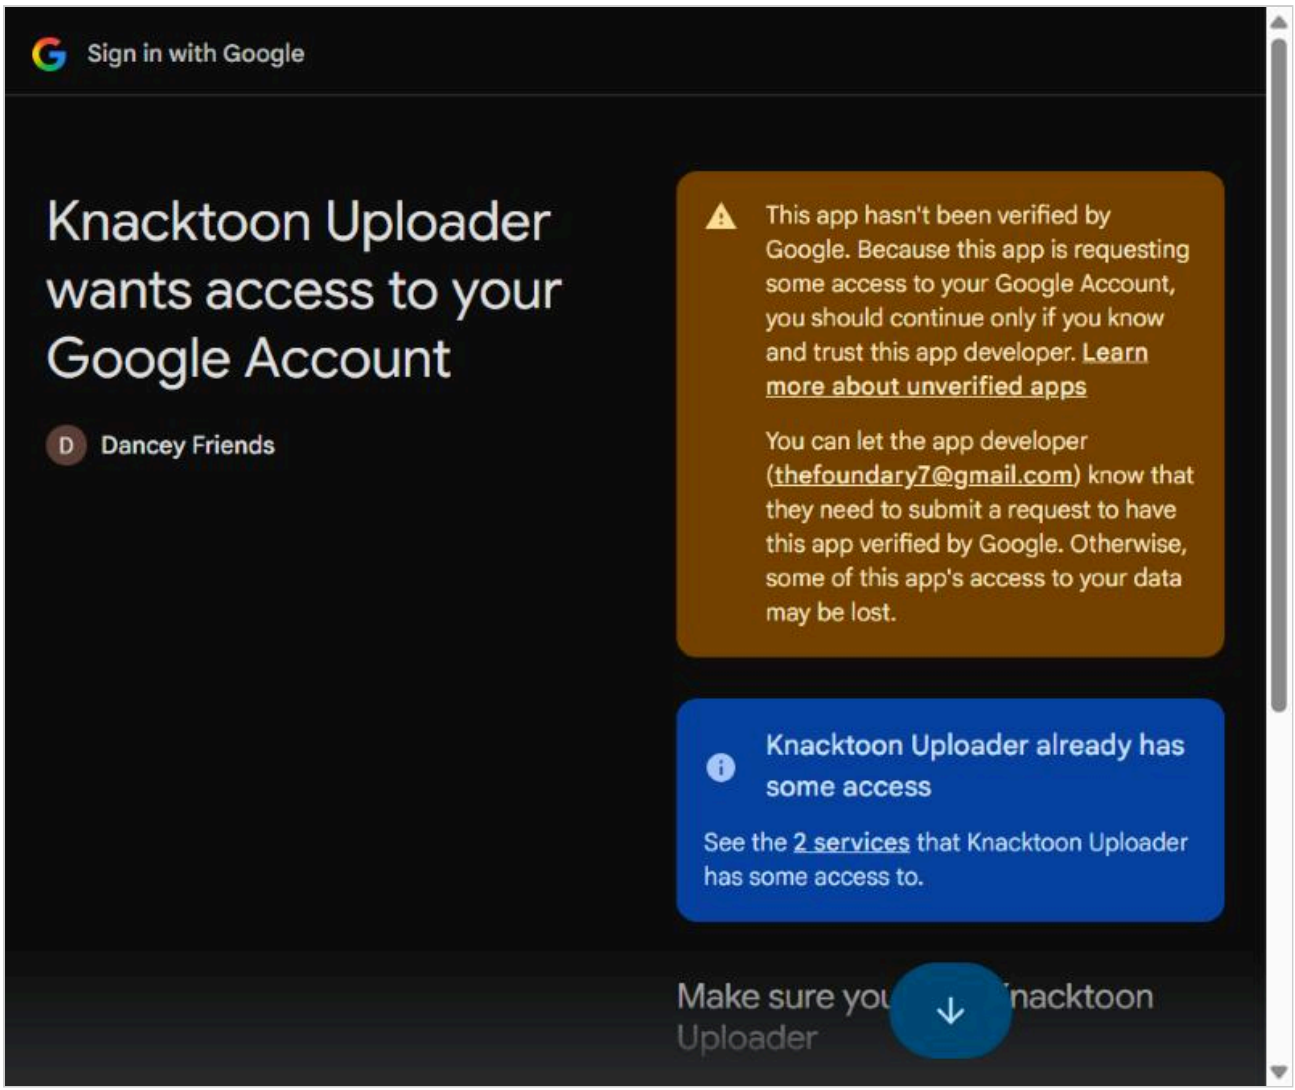

Google hasn't verified this app

The app is requesting access to sensitive info in your Google Account. Until the developer (thefoundary7@gmail.com) verifies this app with Google, you shouldn't use it.

5. Upload interface: the command-line tool (real output; refresh tokens and secrets are never printed)

```
> python scripts/yt_upload.py auth en
Sign in for 'en' in the browser window that opens, and choose that channel.
saved sign-in for en -> Knacktoon (UCm2j94h-A8T94CqrMva9-VQ)

> python scripts/yt_upload.py whoami de
Knacktoon Deutsch (UCd6QmbJYjv83l404-sbKdWw)

> python scripts/yt_upload.py whoami es
Knacktoon Español (UCpGGlUYIUxS_iNva_6lyuKw)

> python scripts/yt_upload.py upload en out/Bees/Bees.captions.mp4 \
    --title "How Bees Protect Farms From Elephants" \
    --description "Sources: Save the Elephants, ... #shorts" --lang en --privacy private
{"id": "QO5PuT_5-tw", "url": "https://youtube.com/shorts/QO5PuT_5-tw", "privacy": "private",
 "publishAt": null, "uploadStatus": "uploaded"}
```

The upload uses videos.insert (resumable). Planned daily use: one Short per channel, uploaded private with a scheduled publishAt so YouTube releases it at the chosen time. The full script is attached separately as upload_script.pdf.

6. Revoking access and deleting data

Access is revoked at myaccount.google.com/permissions (for each channel's brand account); the owner then deletes the local token file. The tool stores no YouTube data besides the refresh token. This is stated in our Privacy Policy: https://manaymcpserver-lang.github.io/knacktoon-videos/privacy.html
